and Implantology

## Giorgio Vogel Award 2022 for the best clinical case

From 2017 the **Italian Society of Periodontology and Implantology (SIDP)** decided to conceive an annual award to honor the memory of the unforgettable **Professor Giorgio Vogel**, founder and Past President of SIDP. The **Giorgio Vogel Award** aims to further involve all members of the Society and in particular those young clinicians who wish to interact in a simple and direct way with other Colleagues and Experts in Periodontology in a dedicated space within the SIDP Annual Congress 2022 (Rimini I, 10-12 March).

The clinical case (presented as Oral Communication) should consider periodontal surgery, implant surgery and/or tissue regeneration. The abstract should be written - in English - using only the appropriate electronic form available online on the website [www.sidp.it](http://www.sidp.it) (section *Announcement of Competition and Awards*) and must contain a description of the clinical case with the diagnosis, treatment goals and description of the procedure and the results obtained.

The iconographic material illustrating the clinical procedure should be organized – in English – in an electronic presentation (PPT or Keynote) by following the suggestions below.

The **electronic file should be sent to the SIDP Secretary** by using automatic file sharing and transfer systems as DROPBOX: <https://www.dropbox.com/> - WE TRANSFER: <https://www.wetransfer.com/>; the material has to be sent to the following email address: [segreteria@sidp.it](mailto:segreteria@sidp.it).

**Abstracts must be sent by February the 5<sup>th</sup> 2022.**

The notification of acceptance or rejection will be sent by email within February the 21<sup>st</sup>, 2022.

A Committee of Experts will evaluate the best case presentation, award the prize consisting in a free annual membership fee and publish the case on the SIDP website.

The **official announcement of the winner** will take place during the SIDP Annual Congress 2022.

and Implantology

## Suggestions for the selection of the photographic documentation

The iconographic material illustrating the clinical procedure should be organized in an electronic presentation (PPT or Keynote) according to the following suggestions and in any case it should not exceed a total of 16 slides.

- **Clinical and radiographical data:**
  1. Overview of the global clinical status.
  2. Closer view of the site to be treated, including adjacent teeth and soft tissues.
  3. Periodontal recordings and inflammatory indices.
  4. Intraoral radiographic status or panoramic radiograph.
  5. Any additional radiographic documentation if significant (CBCT, CT etc)
  
- **Surgery:**
  1. Pre-surgical clinical pictures of the site to be treated.
  2. Incisions.
  3. Flap elevation with an analysis of the defect.
  4. Execution of the surgical procedure (regenerative therapy, osseous resective surgery, implant placement, etc).
  5. Wound suture.
  6. Short term healing (2-4 weeks).
  
- **Treatment outcomes:**
  1. Overview of the treated area showing also the adjacent teeth (and the prosthetic device if any).
  2. Periapical final radiography.
  
- **Follow-up:**
  1. Overview of the treated area showing also the adjacent teeth.
  2. Periapical radiography of the site.

**The maximum number of slides is 16.**

No more than **4 clinical pictures** can be used in **each slide**.
