

Dearest Friends,

just a year ago writing the presentation of the **SIdP International Congress** would have had a completely different flavor from the present one. This time my task is to describe a wider range of feelings and emotions: expectation, hope, determination, enthusiasm and an incredible desire to be together again. It has been more than a year but it seems a century, the pandemic has changed our habits, our way of relating and unfortunately has deeply affected our lives. What before seemed easy and obvious became difficult and uncertain. The organization of this event has required a lot of work and a lot of energy, and more than once the sudden need to start over all over again, dates, venue, format of the Congress.

This would not have been possible without the help of our friends of the Executive Council and the members of the SIdP Cultural Activity Committees and of our peerless MJ Organizing Secretariat, which all together have created a close-knit group that has continued to work without being discouraged by the difficulties. Finally the extension of the vaccination campaign is changing dramatically our horizon, allowing us to see with relief and confidence the carrying out of the **Congress in attendance** on the new date proposed by Rimini Conference Center: **23-25 September 2021**.

Special thanks go to the **large group of the speakers**, national and international, who have accepted the change of date, proving an attachment and a sense of esteem and respect for our Society that made us moved and proud.

Let's come to the contents of the Congress and start with the **Pre-congress Course** on pre-implant bone regeneration in partnership with **Osteology Foundation (OF)**, with also the possibility of participating on Thursday morning to two extraordinary **hands-on courses** on surgical techniques for the reconstruction of peri-implant tissues. A scientific collaboration with **OF** of the highest value that brings together excellence and expertise to offer an update of the highest level.

**The theme of the Congress: New Guidelines in Periodontology in the treatment of Stage III Periodontitis.** A theme conceived and chosen almost two years ago by the 2018-19 Essay Committee, which with great timing anticipated the results of the EFP Guidelines Workshop held in Segovia in November 2019. Talking about guidelines is a moment central to our discipline and to dentistry in general in order to make a qualitative leap aligning dentistry with other disciplines in the medical-surgical area.

On **Friday** we will focus on **the patient with Stage III periodontitis** to understand the limits and opportunities offered by non-surgical therapy alone or associated with additional therapy, then switching to surgical therapy with its various and different procedures. We will do this in a new format with two parallel sessions open to everybody and with a final summarizing joint session before attending a fantastic video session to see what it means to adopt the guidelines in daily clinical practice.

Then **on Saturday** we will focus on supportive periodontal care and how to implement it in daily practice to make periodontal therapy effective and efficient and we'll end with the **Nightmare Session** in order to understand what to do when things go wrong.

We will have on stage the Speakers who have contributed to write the guidelines, in order to have a direct and authentic information capable of translating them into the daily clinical setting.

But the Congress, as you well know, offers much more than that, and includes **workshops, SIdP Giovani**, the prestigious **H.M. Goldman, M. Cagidiaco, G. Vogel** and **G. Cardaropoli** Awards and the 1<sup>st</sup> edition of **C. Cevenini** Award, who will involve clinicians and researchers, dentists and hygienists, private practitioners and academics in an open and stimulating discussion and also the **Sponsor Forum** to present all the novelties and researches that industry and our business partners are advancing in the periodontal and implant field.

An expected event to which our Organizing Secretariat and all the SIdP staff are working with great passion and extraordinary dedication to make it an unforgettable event for everyone and in particular for the **SIdP Family**.

***If you too have expectations, hope, determination and enthusiasm, you cannot miss the 20th International SIdP Congress, we will be there....***

***The SIdP Family awaits you in Rimini! Long live the SIdP!***

Luca Landi  
SIdP President
