Clinical sessions in recession coverage at teeth and implants

It is an honour for us to present this joint SEPA-SIdP symposium, that will explore the state-of-the art of the surgical mucogingival therapy around teeth and implants, under the umbrella of the institutional co-operation between scientific societies that aim to develop clinical practice in Periodontology for the benefit of our patients.

The programme will be divided into two sessions. On Friday 23 November, there will be three theoretical-practical workshops in which participants will be able to learn, under the close supervision of the lecturers, specific surgical techniques. Whereas, on Saturday 24 November, numerous SEPA and SIdP experts will share with the audience different clinical situations and their surgical approaches in order to discuss all the details of their surgical procedures. We believe that this is a unique opportunity to update your knowledge on the fascinating field of muco-gingival surgery.

We are looking forward to seeing you in!

Friday November 23. 14.00 - 19.30

WORKSHOP 1 TUNNEL TREATMENT OF MULTIPLE ADJACENT GINGIVAL RECESSIONS

The appearance of multiple adjacent gingival recessions is a big challenge both for the patient and the professional. At present, there are two surgical techniques designed for their treatment: the tunnelled subepithelial graft and the coronally advanced ap. Both require a good donor sample of connective tissue obtained from the palatal masticatory mucosa. The aim of this workshop is to describe the tunnel technique, together with the surgical details in the design and in obtaining donor tissue that lead to the treatment's success. After completing the workshop, participants will understand the indications, the sequence of the treatment, the technique for obtaining a tunnelled recipient bed of partial thickness, the zone of the palate that is suitable for obtaining the donor tissue, as well as the instruments and sutures that are required.

Ion
Zabalegui

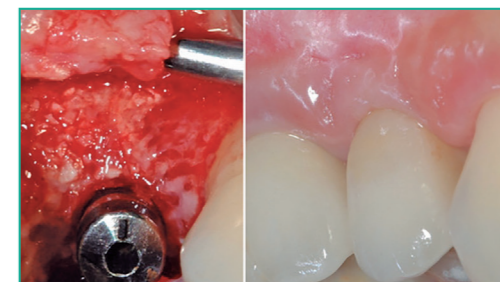

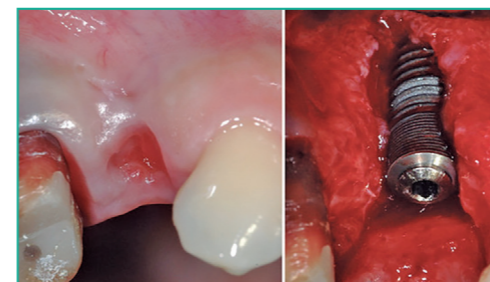

WORKSHOP 2 SOFT TISSUE AUGMENTATION AROUND IMPLANTS

The careful management of soft tissue around implants is considered a key factor to obtain aesthetic outcomes and to support long-term maintenance. Different surgical strategies are useful to improve the amount of keratinized tissue around dental implants, including the use of pedicle flaps and soft tissue grafts. The aim of the present hands on workshop is to evaluate the clinical efficacy surgical procedures and to test with specific practical exercises the most common techniques for soft tissue augmentation at implant sites.

Francesco
Cairo

WORKSHOP 3 CORONALLY ADVANCED FLAP

This hands on course will be on the details in surgical techniques, focusing on incision and suturing and analysing the site site in order to understand when is it necessary to add a connective tissue graft, or biomaterials, to improve the clinical outcome.

Giulio
Rasperini

Programme Saturday November 24. 9:00 -13:30

Moderator:
Ion Zabalegui

09:00 - 09:10 Presentation: **Mario Aimetti, SIdP President and Adrián Guerrero, SEPA President.**
Francesco Cairo and Ion Zabalegui, scientific co-ordinators.

09:10 - 10:10 CLINICAL SESSIONS IN RECESSION COVERAGE AT TEETH

09:10 - 09:40

Recession coverage: defect classification and modifying factors.

Mariano Sanz

09:40 - 10:10

Clinical efficacy and Long-term results of the treatment of gingival recessions.

Giovan Paolo
Pini Prato

10:10 - 13:30 CLINICAL SESSIONS

10:10 - 10:50

Single Miller Class I & II Recession treatment in anterior areas.

Francesco Ferrarotti

José Nart

10:50 - 11:30 **Coffe Break**

11:30 - 12:10

Multiple Miller Class I & II Recession treatment in the anterior mandible.

Martina Stefanini

Rafael Naranjo

12:10 - 12:50

Multiple Miller Class I & II Recession treatment in the anterior maxilla.

Fabio Vignoletti

Silvia Masiero

12:50 - 13:30

Single Miller Class III Recession treatment in the anterior maxilla.

Roberto Rotundo

Sofia Aroca

Programme Saturday November 24. 15:00 -19:00

Moderator:
Francesco Cairo

13.30 - 15.00 LUNCH

15.00 - 19.00 CLINICAL SESSIONS ON SOFT TISSUE MANAGEMENT AT IMPLANTS

15.00 - 15.15

Marginal soft tissue dehiscence around implants: an overview.

Juan Blanco

15.15 - 15.30

Implant surgery focussed on the prevention of future marginal tissue recession.

Mario Rocuzzo

15.40 -19.00 CLINICAL SESSIONS

15.40 - 16.05

Prevention of Soft tissue deficiencies around single implants.

Alberto Sicilia

16.05 - 16.30

Treatment of buccal soft tissue dehiscence around single implants.

Giovanni Zucchelli

16.30 - 17.00 **Coffe Break**

17.00 - 17.40

Treatment of soft tissue deficiencies (quality and quantity) around implants in partial and complete cases.

Giorgio Pagni

Antonio Liñares

17.40 -18.20

Treatment alternatives to *untreatable* recessions on dental implants.

Raffaele Cavalcanti

Laurence Adriaens

18.20 - 19.00

Discussion and conclusions. **Ion Zabalegui and Francesco Cairo.**
Mariano Sanz, Pini Prato, Juan Blanco and Mario Rocuzzo.

Sweden & Martina pre-European Symposium course

Friday November 23. 09.30 - 13.00

Sweden & Martina offer this pre-symposium event, with limited places and free registration for those signed up for the Symposium, in which the Xavi Vela, Xavi Rodríguez, Giovanni Zucchelli, and Ignazio Loi will provide a comprehensive vision of how to evaluate and treat peri-implant diseases.

Free Registration for those signed up for the Symposium

Limited Places

09.30 - 09.40 Institutional and scientific presentation.

09.40 - 10.30

Biology of peri-implant tissues and its clinical implications.

Xavi Vela

Xavi Rodríguez

10.30 - 11.20

The relevance of the soft tissues in the outcome of peri-implant therapy.

Giovanni Zucchelli

11:20 - 11:50 Coffe Break

11.50 - 12.40

BOPT, vertical revolution and response of the soft tissues.

Ignazio Loi

12.40 - 13.00

Discussion
