

Dear Friends,

Here we are again!

With great pleasure and pride I present you the program of the **22<sup>nd</sup> SIdP National Congress**. By doing so, I want to thank, first of all, the 2020-21 Cultural Committee which has proposed most of the ideas to build this fantastic scientific program under the title: **“BACK TO THE FUTURE. The interdisciplinary therapy of Stage IV Periodontitis”**.

Why **“Back to the Future?”** Because just like in the film directed by the visionary Robert Zemekis, this title, in addition to evoking the need to leave behind us an unusual past characterized by a pandemic, it is also an encouragement to go back home, the place that makes us feel good in our present.

Back to the future for SIdP means also re-discussing consolidated concepts regarding the therapy of Stage IV Periodontitis, in light of the Guidelines of the European Federation of Periodontology, the contents of which will be presented during the lectures of the Congress.

Following the SIdP tradition and in continuity with all the past presidents, I really hope that the Congress will prove to be an authentic opportunity for aggregation and "contamination", this time for ideas only. A place where we can meet and live moments of scientific knowledge, but also of professional inspiration, of sociability and of culture in a broad sense.

Much time will be devoted to research and innovation. Periodontal and implant topics will be presented in an interdisciplinary clinical perspective, always adhering to the theme of the Congress.

All the different membership categories will be represented, including the experts, the opinion leaders in various subjects, the young dentists, the students, the general practitioners, and the "pure" researchers. Dental hygienists will appreciate an event of the same topics, with some sessions in conjunction with dentists, and others specifically reserved to them.

Going into details regarding the **content**:

**Thursday** presents an intense pre-congress program with various **Workshops** and **Lunch & Learn** sessions, as well as the prestigious **Goldman, Vogel, Cagidiaco, Cevenini Awards** during which researchers and clinicians, dentists and hygienists, will openly discuss periodontal and implant topics, according to the usual SIdP style.

I am happy to point out "**Spazio Giovani**" managed as always by the organizing junior committee, which will discuss an emerging problem concerning the "deregulation" of scientific communication on social media and the risk of dental "pornography". It will be an event within the event people will certainly talk about for a long time!

On the same day, **2 Pre-congress Courses** will be held specifically for dentists and hygienists: the one for dentists will focus on the placement of implants near periodontally compromised teeth; the one for dental hygienists will address the role of the hygienist in the different phases of therapy for Stage IV periodontitis patients. Both courses will be presented by SIdP top-speakers and will have a special interactive formula.

The end of the day provides a unique opportunity for our business partners to present, during the **Forum for Innovation**, the most recent technological and research innovations for the benefit of our patients in an always very popular friendly session.

On **Friday** we will focus on interdisciplinary treatment and therapeutic options with clinical sessions for dentists and hygienists, always interactive, with discussion and final shared considerations. I am pleased to announce a **common session** with an **Opening Lecture on ethics** applied to the profession for the common good and sustainability and a **Lectio Magistralis** on the management of complexity in interdisciplinary treatment.

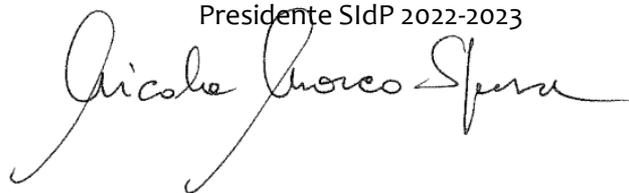

On **Saturday** we will complete our path on the therapy of Stage IV Periodontitis and at the end of the Congress I would like to point out a new session: **The Post-Congress: Let's learn from the Experts!** It is a session consisting of **3 Courses**, in which international speakers of the SIdP, in an informal and relaxed way, will show the participants with images, diagrams and many videos, **when, why and how to do it** in regenerative surgery, mucogingival surgery and in supportive periodontal therapy. This last course will be open to all the OfficeTeam members (Secretary, Hygienist, Dental Assistant) and will be free for Members certified by the **SIdP Surgery Project**.

One more mention to the **Training Camp**, a hands-on session reserved to the student associates, concerning the mucogingival surgery and held by a leading academic team.

**I look forward to seeing you at the Congress to join the SIdP family!**

Nicola M. Sforza
