## UPDATING COURSE

# Peri-implant diseases therapy: Operative procedures and maintenance of the results

From 17 May to 18 May – **BOLOGNA** Palazzo della Cultura e dei Congressi

Coordinators: **Rodolfo Gianserra** Campobasso-Rome I, **Mario Rocuzzo** Turin I

Speakers: **Marco Aglietta** Bern CH - **Jan Derks** Göteborg S - **Silvia A. Masiero** Saronno I  
**Claudio Mazzotti** Russi I - **Stefano Parma Benfenati** Ferrara - **Simone Roatti** Saronno I  
**Mariano Sanz** Madrid E - **Massimo Simion** Milan I **Alessandra Sironi** Milan I

## Course Presentation

As in any other medical or surgical procedure, the use of osseointegrated implants involves the need to acknowledge the biological foundations that regulate their clinical behavior over time. In addition to this, of great importance is to understand all those systemic and local factors that, in different types of patients receiving the same therapy, can lead to different clinical results. Only adequate knowledge, associated with a correct clinical practice, can allow therapeutic and prognostic success.

Last year we dealt with implant malposition. We discussed the problems that could be caused by an incorrect planning or therapeutic execution.

This year instead, we will deal with the issue of peri-implant diseases, which, given their high prevalence, heavily affect the clinical practice. We will start with the analysis of the etiopathogenetic factors that influence the genesis of biological complications of osseointegration and with diagnosis and prognosis of peri-implant diseases.

We will then move on to a more clinical part of the Course supported by Tutorial Video Sessions aimed at illustrating the operative procedures for treatment of the peri-implant infection in its several steps. The Course, through the innovative video tutorial, will illustrate step-by-step every single procedure and will allow us to face every clinical procedure starting from decontamination and disinfection of the implant surface. We will evaluate together how far non-surgical therapy can go and when a decontamination by means of conservative surgical therapy for treatment of peri-implantitis becomes necessary.

Saturday will be dedicated to "protective" mucogingival surgical procedures to maintain healthy implants, resective or regenerative surgeries when the bone defect induced by implant infection requires, in addition to biofilm control, an anatomical correction. The goal is to give clear and practicable information in the clinical reality.

Last Saturday session will allow us to face the peculiarities of the supportive therapy, which is fundamental in the maintenance of these situations. We will try, through some questions the coordinators will ask to the speakers as well, to understand when it might be more useful to proceed with the removal and/or replacement of the contaminated implant.

Topics of significant clinical utility.

To have specific knowledge and skills in the treatment of peri-implant diseases is essential.

Our task will be to distinguish false myths from an appropriate clinic approach.

Waiting for you in Bologna.

# Program

**Friday, 17th of May 2019**

## ETHIOPATHOGENESIS OF PERI-IMPLANT DISEASES

- 09.00-09.15 **Greetings from the SIdP President, Mario Aimetti**
- 09.15-09.30 **Introduction** by the Coordinators
- 09.30-11.00 **Factors influencing biological complications of osseointegration**  
**Mariano Sanz**
- 11.00-11.30 *Coffee-break*
- 11.30-12.30 **Diagnostic and prognostic evaluation of peri-implant diseases**  
**Jan Derks**
- 12.30-13.00 **Discussion**
- 13.00-14.15 *Break*

## TUTORIAL VIDEO SESSION: OPERATIVE PROCEDURES FOR TREATMENT OF THE PERI-IMPLANT INFECTION

- 14.15-14.30 **Introduction** by the Coordinators
- 14.30-15.15 **Procedures for decontamination and disinfection of the implant surface**  
**Marco Aglietta**
- 15.15-16.00 **From non-surgical procedure to conservative surgery** (first part)  
**Massimo Simion - Alessandra Sironi**
- 16.00-16.30 *Coffee-break*
- 16.30-17.00 **From non-surgical procedure to conservative surgery** (second part)  
**Massimo Simion - Alessandra Sironi**
- 17.00-18.00 **Guided discussion with the presentation of a clinical case “Study Club”**

**Saturday, 18<sup>th</sup> of May 2019**

## TUTORIAL VIDEO SESSION: OPERATIVE PROCEDURES FOR TREATMENT OF THE PERI-IMPLANT INFECTION

- 09.00-09.15 **Introduction** by the Coordinators
- 09.15-10.00 **Plastic surgery operative procedures for peri-implant health**  
**Claudio Mazzotti**
- 10.00-10.45 **Resective surgery operative procedures for defects correction** (first part)  
**Stefano Parma Benfenati**
- 10.45-11.15 *Coffee-break*

- 11.15-11.45 **Resective surgery operative procedures for defects correction** (seconda parte)  
**Stefano Parma Benfenati**
- 11.45-12.15 **Operative procedure for maintenance of long term results**  
**Silvia Masiero – Simone Roatti**
- 12.15-13.15 **Guided discussion with the presentation of a clinical case “Study Club”**

## General information

### **Venue** Palazzo della Cultura e dei Congressi

Piazza della Costituzione, 4 - BOLOGNA

<http://www.bolognacongressi.it>

**How to register** SidP Members can attend for free if regularly enrolled in the Society for the year 2019. It is possible to sign in on the web site [www.sidp.it](http://www.sidp.it)

From the 4<sup>th</sup> of March, 2019 it is possible to confirm participation in the Course on the above website.

**ECM Accreditation** The event is included in the CIC 2019 Training Plan– Provider nr. 696. It will be accredited to the National Commission for Continuous Education exclusively for the profession of **Dentist** and **Dental Hygienist**.

**Certificate of Attendance** It will be possible to download the certificate on-line within 10 days from the end of the event.

**Coffee-break** Coffee breaks will be served in the exhibition area at the times indicated on this program.

**“On-line” Course** It is offered to all the Course Participants **regularly signed at the Society, the opportunity to review and listen to all the Course reports** in original language.

Access to the service is active from the reserved area for Members, on [www.sidp.it](http://www.sidp.it), starting from 21 days since the end of the Course and for the following 12 months.
