

Presentation

The new Periodontal Classification has brought some innovations. Not only in regard of the severity, extension and distribution of periodontitis, but also with the rate of progression of the disease and with the complexity of disease management. Masticatory dysfunction, dental displacement and occlusal trauma are some of those factors that will make a periodontal case complex to treat.

The aim of the course is to share some diagnostic and therapeutic decision-making processes, which will draw boundaries between management of a periodontal stage III case by a generic or specialist dentist and the need of an inter-disciplinary therapy in stage IV periodontitis.

The rationale is to give some indications in order to propose an ethical and appropriate therapeutic solution in a multidisciplinary Treatment Plan that puts the patient "at the center" and that is founded on the willingness of the patient to participate to the therapy.

The analysis of the oral health "care project" involves the coordination of the various specialists and it has the intent to obviate the growing "separateness" of the different dental specialties.

The project is to involve experts in the field of periodontics, implantology, orthodontics, prosthodontics synergic in a multidisciplinary rehabilitation treatment plan, when the stomatognathic system is heavily compromised due to the progression of periodontal disease.

The "convergence" of different points of view represents the best way to conceive the most appropriate therapeutic proposal for the patient who entrusts the care of his oral health to us.

Mauro Merli
Course Coordinator

Friday, October 4th 2019

- 09.15-09.45 **Introduction: Rehabilitation of health, function and aesthetics in patients suffering from periodontitis of stage III and IV**
Mauro Merli
- 09.45-11.15 **The orthodontic solution** (part I)
Francesca Manfrini, Marco Rosa
- 11.15-11.45 Coffee break
- 11.45-11.55 **Presentation of the thesis winning the prize "M. Calandriello 2018 "**
Michele Augusto, *University of Ferrara*
- 11.55-12.45 **The orthodontic solution** (part II)
Francesca Manfrini, Marco Rosa
- 12:45 to 14:15 Lunch break
- 14.15-15.45 **The prosthetic solution** (part I)
Diego Capri, Giacomo Ori
- 15.45-16.15 Coffee break
- 16.15-17.15 **The prosthetic solution** (part II)
Diego Capri, Giacomo Ori
- 17.15-18.15 **Guided discussion with the presentation of a "SidP Study Club" clinical case**

Saturday, October 5th 2019

- 09.00-10.30 **The implant-prosthetic solution**
Mauro Merli, Carlo Poggio
- 10.30-11.00 Coffee break
- 11.00-11.10 **Presentation of the thesis winning the prize "M. Cattabriga 2018 "**
Martina Arena, *University of Turin*
- 11.10-12.30 **The implant-prosthetic solution**
Mauro Merli, Carlo Poggio
- 12.30-13.30 **Guided open debate through the presentation of a "SidP Study Club" clinical case**
